Qtech Control

Qtech Control Limited

www.qtechcontrol.com

ISO 17020 third-party inspection company offering inspection, expediting, witness testing and quality control for rail supply.

Qtech Control Limited, an ISO 17020 certified third-party inspection company, offers a comprehensive range of services to the rail sector including inspection, expediting, witness testing, and quality control on a global scale. Our UK headquarters serves as the hub for coordinating inspections for a diverse range of industries including rail, engineering, oil and gas, manufacturing, energy, commodity trading, and marine.

We are nominated to safeguard our clients' quality interests at manufacturing sites. We accomplish this by witnessing Factory Acceptance Tests, performing quality control checks, verifying quantities against packing lists, and by supervising packing and marking. We are also often entrusted with overseeing the safe and secure loading of goods into packing cases, containers or aboard vessels. Our primary goal is to ensure that goods are manufactured in accordance with the contractual specifications and are shipped without damage and in full quantity.

To mitigate the financial impact of supplier production and delivery delays, Qtech Control provides seasoned expeditors to monitor production schedules. Their role is crucial in ensuring that vendors adhere to critical manufacturing and delivery timelines.

In Turkey, we offer discharge supervision, quality control, damaged cargo investigation, and client representation at ports, warehouses or on site.

We have extensive experience at inspecting the following goods categories within the rail sector:

- Plant and Machinery: including large scale boring machines, tracking laying machines, cranes, trucks, concrete mixing machines, tractors and excavators.
- Lighting and Signalling Systems.
- Electronic and IT Equipment: including ticketing kiosk systems, signage and electronic display boards.
- Construction Materials: including rail, fabricated metal structures / buildings / shelters, glass, cast concrete products, metals, concrete, rebar, paint and marking machinery.
